

MYKOLA HERASYMCHUK

Skills

Python

Libraries: Pandas, Matplotlib, SciPy, BeautifulSoup2, NumPy, sympy, pyscf

Tableau

Packages: shiny, ggplot, tm, tidyR

Excel

Tools: Pivot Table, Pivot Chart, XLOOKUP, VBA

Power Bi

Tools: DAX, API, Power Query

SQL

Software: BigQuery, MySQL, MSSQL

Projects

SALES FUNNEL ANALYSIS – Personal Project September 2026

- Analyzed **end-to-end e-commerce sales funnel performance** using Advanced **MySQL** to evaluate conversion rates, time-to-conversion, and revenue metrics across user acquisition sources
- Identified customer journey bottlenecks** from transactional data to pinpoint key operational inefficiencies
- Delivered strategic recommendations** to optimize sales operations, marketing channel spend, and overall lead-to-customer conversion efficiency

COFFEE SALES DASHBOARD – Personal Project September 2026

- Designed an interactive **Excel** dashboard to track key business metrics, including total revenue, regional sales, and customer purchase trends over time
- Cleaned & transformed raw datasets by removing duplicates, standardizing dates, and applying (**XLOOKUP, INDEX/MATCH, IF** logic)
- Aggregated and visualized multi-source data using **Pivot Tables, Dynamic Pivot Charts, and Slicers** for executive reporting

INTELLECTUAL DATA ANALYSIS – Personal Science Project September 2026

- The primary objective of training the **ML models** is to determine material quality based on mechanical properties
- Following standard data cleaning and **EDA**, a **train-test split** was performed
- ML models were trained: Decision Tree; K Nearest Neighbors (KNN); Support Vector Machine (SVM); Random Forest (RF)

VALENCIA REAL ESTATE ANALYTICS – Personal Project August 2026

- Utilized **Python** to cleaning and **EDA** of raw rental market datasets using the **pandas** and **NumPy** packages
- Designed an **interactive Tableau dashboard** featuring spatial price mapping, neighborhood-level pricing breakdowns, and property-type performance charts to assess ROI for prospective buyers.

Work Experience

E.O. PATON ELECTRIC WELDING INSTITUTE – Research Internship – Kyiv, UA September 2024 – May 2025

- Development of a composite photopolymer and writing a thesis on this topic.
- Raw data cleaning (**Excel**), exploratory data analysis (EDA) (**Python**), calculation and visualization of research data using **MATLAB**.

PLASMATEC – Part Time Job – Kyiv, UA October 2024 – September 2026

- Hands-on experience with electron microscopy; Conducted research using diffraction spectroscopy; Performed analysis with X-ray fluorescence (XRF) spectrometry; Gained familiarity with Electron Beam Welding (EBW).
- Design and construction of a fuel cell system. Data collection and documentation (**Excel**). Visualization of research data using **MATLAB**

Education

MASTER`S DEGREE – NTUU KPI – Kyiv, UA June 2027

Majors: Applied physics and nanomaterials
